All the relevent information is there, from servicing to major component repair. My only slight complaint would be the clarity of the black and white photos is not as good as it could be on some of the pictures. This book was so helpful and saved me a ton of cash fixing small things myself. Shows and explains exactly how to do bigger repairs too, I just wasn't confident enough to do some of them. November 2009 Learn how and when to remove this template message The Shadow line features motorcycles with a liquidcooled 45 or 52degree Vtwin engine ranging from 125 to 1,100 cc engine displacement. The 250 cc Honda Rebel is associated with the Shadow line in certain markets. However, due to tariff restrictions in the United States on imported Japanese bikes over 701 cc, the VT750c was reduced to 700 cc in 1984 and was sold as the Vt700c. In 1985, the tariff was lifted and the line soon expanded to an 1,100 cc bike the VT1100c. The line changed little until the introduction of the 750 cc Honda Shadow Ace in 1997. From 2000 to 2007, the Honda Shadow Sabre replaced the VT1100 until the 1,100 cc class was discontinued in favor of the new VTX line, specifically the 1,300 cc offering

known as the VTX1300. As of 2011, the Shadow brand has been limited to a single 750 cc cruiser available in Spirit, Aero, Phantom, and RS trims. All other offers are known under the VTX or Rebel brands. Both are Fuel injected.

Shadow RS recalls a flat track racing bike with chain drive, a peanut style gas tank and a slightly higher seat height 29 inches with foot pegs less forward than conventional cruisers meaning a more standard seating position. Phantom is more like a conventional cruiser in ergonomics. It also has a chain drive instead of a shaft drive seen on the larger engined bikes. Sales ended in 2009. The front fender is chrome and this year the side covers and engine covers were painted black. The headlight was chrome and rectangular and there was a single horn. The engine is virtually the same as the 1983 model. This model continued with the dual horns. A two piece seat with an integrated backrest was incorporated. Starting this year, the engine covers were polished chrome and the fins enlarged. It has a single shock rear suspension, a low 27.1 inch 690 mm seat height and a long 63.2 inches 1,610 mm wheelbase with a 2.4 US gallons 9.1 l; 2.0 imp gal fuel tank. The wheels are spoked. The VT600C was not made in 1990 but did make a comeback in 1991 offered only in black. The engine and body style was retained from the 1991 model year. The seat on the deluxe version is soft and tucked. By 1994 the Deluxe model was a standard offering for every year the VLX was made. Each cylinder head had a single chain driven camshaft and an individual downdraft 36 mm 1.4 in CV carburetor. Engineering innovations appeared in the transmission as well. Cast wheels were changed from ten spokes to five. Gold color was added to wheels, crankcase cover and headlight trim. Side covers displayed the single word Shadow and Hondas wing logotype was showcased on the tank. The passenger backrest was eliminated. The 800cc engine had the same bore diameter as the original Shadow 750 engine, and a 5.1 mm 0.20 in longer stroke, but was otherwise the same SOHC, 3 valves per cylinder, 45 degree Vtwin engine. Color combinations were Black and Candy Glory Red, or Candy Wineberry Red and Dry Silver Metallic.

The RC44E engine had its origin in the 600cc Shadow VLX 52 degree Vtwin, enlarged to 750cc by means of a 4 millimetres 0.16 in wider bore and a 10 millimetres 0.39 in longer stroke. This new engine was similar to the old RC14E Shadow 750 in that it had liquid cooling and SOHC three valve dual plug combustion chambers, conversely, it lacked hydraulically adjusted valves, offset crankpins and a slipper clutch. Further changes to the drivetrain included a wider ratio five speed gearbox down from six and a chain final drive instead of shaft. From 2001, North American models had the speedometer mounted on the tank the same as European and Australian versions. SOHC cylinder heads still had two spark plugs and three valves, but were modified to increase the compression ratio. All models used a 1099cc displacement engine, the Honda VT1100 engine with minimal mechanical changes during its production. The engine is a 1,099 cc 67.1 cu in SOHC liquid cooled Vtwin with a five speed transmission and shaft drive. Both exhaust pipes were now run along the right side of the bike, with the horns being relocated to the sides of the engine. The engine, while the same 1099 cc displacement as the previous model, is rated for approximately 60 horsepower due to shorter stroke and larger pistons. It also now had a four speed transmission with a hydraulically actuated clutch. This styling continued through 1996. The American Classic Edition A.C.E. VT1100C2 was introduced this year. It featured a more retro styling than the standard with a full rear fender, induced vibrations, and Harley Davidson like sound from a single pin crank engine. The model also lost about 10 hp. An ACE Tourer was also introduced based on the 1100 Spirit engine but the ACE styling. The ACE Tourer came with a two into one into two exhaust system, a counterbalanced with a dual crank pin crankshaft, and hard, color matched saddlebags. The 1100 Aero was discontinued after the 2003 model year.

The most notable feature was the front cast aluminum wheel. This model also had a slightly lower rear gear ratio in the transmission allowing the bike to have better off the line acceleration than the regular Spirit model; however this also caused higher engine RPM at highway speeds. Due to lower

sales and the availability of the VTX1300, 2007 was the final year Honda made the VT1100 Shadow. In 1998 Honda launched the VT750C ACE which also has a single pin crank. Retrieved 14 October 2018. From its very introduction in 1983 as a 750, this particular lightweight VTwin not only became Honda's bestselling model, but America's best selling motorcycle of any kind, period. In my opinion, this model makes a better all-around motorcycle than any of the new midsize cruisers. Therefore the Hurricane 1000 sportbike; the 800 Shadow, which had been a challenger to the Harley-Davidson Sportster; and the Magna 750 are gone. Despite its relatively small displacement for a cruiser, the Aero now has the appearance of a much larger machine, which is especially accentuated by its oh-so-long rear fender. The 2010 Honda Shadow RS increases the Japanese marque's entry-level Shadow lineup to four models. Retrieved 21 November 2018. The 2013 Honda Shadow 750cc cruiser line consists of four models, from the lowslung Aero to the blacked-out Phantom. With a fuel-injected 745cc VTwin powerplant nestled in a chassis that boasts classic lines and standard-style riding ergonomics, the latest Honda cruiser is a barebones motorcycle, one which the rider may do with as he or she sees fit. To my surprise, the 2010 Shadow RS isn't a fake Harley-Davidson designed for poseurs. Retrieved 16 November 2018. Finally, this new RS is a Shadow you don't have to be a full-on cruiser person to get behind. The RS stands for retro standard and that sums it up perfectly. It's not really a standard, it's certainly not a sportbike and it's not really a cruiser either.
