Its fairly versatile, very easy to use and maintain, and it has only a few issues that bug me. Pros It really is pushbutton easy to use. You can select a short, regular, or long shot from their own buttons, and selecting strength only involves using another button to cycle through the 5 settings. Cant get much easier. Making a latte or cappucino just involves adding cold milk to the container, topping with the appropriate lid, attaching the container, extending the milk tube, and pressing the button. It mightve taken longer to type that than to do it. The milk container fits well enough in the refrigerator door. Cleaning is relatively easy. The brewing unit detaches simply ONLY detach with the unit is OFF and just rinses out. The grounds container just dumps out, although there is a corner in that container that traps wet grounds and involves an extra wiping step not really a big deal, but it can mold. Even though weve never actually been prompted to do so, we descale on the first of the month, and thats quite easy to do. The milk container lids are not difficult to clean, but they do take some actual washing although running the steam through via the machine does a great deal. Regarding descaling, do take the time to test your water with the little, included strip, and then set your water quality with the machine. I understand that the default setting is the hardest water, so a couple minutes of your time on the front end could very well save you a great deal of time down the

road if you have softer water. Finally, and perhaps most importantly, the coffee is very good. We made only a very slight adjustment to the grind after we got the machine, but that's it and, to be honest, we probably did not need to do so I just have to monkey with something. Cons My biggest complaint and it's not a big one is that you cannot access any menu selections without turning the whole thing on and waiting for it to heat up and go through the initial rinse cycle. <http://oumkua.com/userfiles/3m-laser-pointer-manual.xml>

The machine is either on and ready to make coffee or off and completely dormant with the menu button just dead. If I could change only one thing, this would be that thing. A close second thing I would change would be to make the safety grill over the mill removable. I'm all for safety, but this thing is a pain if you ever want to change the coffee beans you have in the hopper. It's a large machine, and it does make some noise, but I don't know that either issue is any different with any other machine except the new, compact ones. It's a pretty big machine, and you'll be reviewed in the United States on April 3, 2017 DO NOT BUY. Here is why. This is the second DeLonghi I have purchased. The first one lasted about six years. This one only lasted a year and a half. Here is the issue I contacted DeLonghi because the water pressure dropped and would not descale or fill a cup of coffee. DeLonghi is now honoring the warranty. It just stinks that I had to go through such grief to get there. Please try again later. From the United States The first one lasted about six years. This one only lasted a year and a half. Barry 4.0 out of 5 stars Jura just broke down way too often and way too costly and inconvenient to send back and forth to NJ for repairs. This machine makes good coffee but after 2 weeks, noticing grinder is getting stuck will continue to evaluate. The latte portion is amazingly easy to use. CONS small water container and doesnt warn you until it is really low. No warning beans are almost empty so you could make a coffee without adequate beans. Only moderately customizable and not easy to customize. Very slow heating up and rinsing process. No water filtration option and any good coffee lover knows the water is key to a great cup. PROS produces a hotter coffee than Jura. Easy access to all bins and removable components easy to clean. Quiet. Small footprint fits easily under cabinetry.Please try again later. My wife discussed the problem with our 1st Magnifica with a factory rep over the phone and they sent us a flexible seal that slides ove the steam tube and we now have two working MGNIFICA DeLonghi coffee makers. We are keeping the older one as a spare and to be sure we always have that cup of cappucciono in the morning. Finally, we have owned several other brands over the years that cost less to buy but did not last more then two to four years and most importantly didnt make as good a cup of coffee or cappuccino.Please try again later. 0 out of 5 stars The model 3300 makes just as good a cup of coffee but uses a steam wand to heat and froth the milk. I love the steam wand. And the 3300 model is much cheaper than than this 3500. I give the 3300 5 stars.Please try again later. Please try again later. Richard Berlanti 1.0 out of 5 stars Out of the box is was defective and never worked. I contacted Delonghi directly to see if they would replace under the warranty. This is after waiting on hold for 30 minutes to talk to a rep. Another 30 minutes to trouble shoot, and still they refuse to replace machine. I have to speak to a supervisor who then takes 10 days to make a desicion to not replace the machine as they think the Amazon seller sold me a refurbished machine. Just be warned, this is the third Delonghi machine I have purchased. The first one lasted 5 years. The second one was defective out of the box and it took me 2 months to deal with Delonghi. I will never purchase another Delonghi again. The company is very difficult to deal with. And their products do not last.Please try again later. Please try again later. Allan 5.0 out of 5 stars Years later, we now have given the 3300 to our son and have purchased 3 of the ESAM3500 model so we can drink good coffee at home, at our mountain cabin, at the office, and at our sons house. Along with a particular brand of coffee we prefer, the DeLonghi makes the best cup of coffee we have ever drunk anywhere in the world and we have traveled widely. Several of our friends have bought a DeLonghi ESAM3500 too, after drinking our coffee, so the population of snobs is growing. It is important to keep the machine as clean as possible throughout or there will be problems. This is the Ferrari of coffee makers, and it needs TLC to keep it performing at its maximum potential.Please try again later. Please try again later. jaxmike 5.0 out of 5 stars It makes the best coffee I have ever tasted. It is completely automatic so you have nothing to do but fill it and empty it.

The only drawback I have, other than the price, is that the function to re size the cups you use is limited. I use 12 oz coffee cups, but the machine only allows 6.3 oz at the most, so I just set it for 2 coffees. Allinall, you get what you pay for. Excellent Machine DeLonghi !! Update !!! I had to send my machine in for repair after only having it for 2 months. It leaked water. Well, customer service told me it would be a month under warranty. I thought to myself, thats a little much, ONE MONTH !!! So, I sent it in. Now, almost TWO MONTHS later I still dont have it. Customer Service told me

that the service center is backed up. Repair did a good job and the machine works like new again. I just hope it lasts more than 2 months again. I have to be fair about it. The people at customer service were very nice about everything and were very apologetic about the whole ordeal. Please try again later. Please try again later. Alice Peters 2.0 out of 5 stars We noticed a funny noise and called DeLonghi who recommended that we send the machine to their authorized repair, Appliance Repair Center in Middletown New York. That was about 5 months ago. After about 6 weeks, and many followup phone calls, we finally received the machine back from Appliance Repair in pieces. Apparently, they had not packed it well UPS denied the insurance claim. After more time and phone calls also to DeLonghi service, we were told that the repair center was ordering the broken parts, repairing the machine, and sending it back to us. That was about 4 weeks ago. Two weeks ago, when we called again, we were told that the machine was fixed and would arrive back to us by the middle of last week. As of today, still no machine and no confirmation of when we will get it. Appliance Repair Center is totally unreliable and DeLonghi needs to address this issue. It really makes me sad because I enjoyed this machine and have recommended it many times.

To all of you who own one, be careful if it needs repairing and don't trust DeLonghi's recommendation. Please try again later. Please try again later. EE 5.0 out of 5 stars It probably gets used 15 to 20 times a day and it still works like it was brand new. You do need to learn how to clean it which is very, very easy to do and, depending on your water, you need to descale the machine periodically. This is also very easy to do. Previously, I had tried several of the other brands, but this is the only one that lasted more than a couple of months and wasn't a pain to use. Please try again later. Please try again later. Annoying is the automatic rinsing process, although necessary, if you forget to put an empty cup under the spout it fills up the bottom tray. The separate milk container is very easy to remove. I spend a lot of money at Starbucks so I decided this Christmas to treat myself to this espresso machine. So far no complaints. Verisign.
